

New Talent Scheme

JT's Bursary Scheme

Financial support and professional
development throughout your studies

Preparing for university?

The run up to university can be a daunting and stressful time, especially when there is so much to think about and do. From finalising your UCAS application, waiting to receive your exam results and finally – hoping that you get your chosen place at university.

What is the JT Bursary scheme?

Each year we seek **innovative** and **creative** individuals with a **passion for technology** to join our Bursary scheme.

We offer you challenging **6-week paid work placements** with us each year, where you'll be able to apply all the theoretical knowledge you've gained from your studies in a professional working environment.

We also provide a **£2,000 financial grant** towards the costs of your studies.

When do you recruit and how do I apply?

We begin reviewing CV's in August after you receive your results. Interviews typically take place mid to the end of August and we aim to offer successful candidates a position in September.

Why JT – what makes you different?

We will get to know you so that we can **understand your motivators** to help best place you within our business ahead of your placements with us.

This is more than just a tick box exercise and we want you to have the most **enriching experience** you can.

Your development here is limitless and we are committed to developing the talent of the future – and that could be you.

What is Life at JT for a Bursary Student?

“JT Bursary students have played a big part in **redesigning our HR SharePoint site** and provided automation on our weekly security tools. We will give you packaged projects that you can work on, develop, and deliver.

You will always have a **mentor** and a large network of other Grads and Bursary students at JT, so you are **really well supported**.

What is great about the bursary scheme at JT is its **flexibility**, what you put into the scheme, we will give back and more. It’s not just two sets of 6 weeks to us, we **value** the relationship and the chance to build your skills and expand your experience.”

Andy Jarvis
Head of Corporate IT
and a sponsor of our Bursary,
Apprenticeship & Graduate
schemes.
