

New Talent Scheme

JT's Graduate Scheme

Accelerate your professional career
after your university studies

Seeking a challenge after completing your degree?

You've spent most of your life preparing for the next stage. From primary school to secondary school, from secondary school to college/A-Levels and then onto university... but you're almost coming to the end of your education so, what do you do now?

What is the JT Graduate scheme?

Our Graduate scheme is designed as a **stepping-stone** to transition you from fulltime education into a professional working environment.

We offer **challenging placements** through a rotation programme with many areas of our business such as **Coding, Business Analysis or Design and Innovation**. Throughout your rotations you will receive dedicated on the job training and mentoring.

We also look to support a **6-month secondment** at one of our global offices in **Europe or Australasia**.

Our Graduate scheme also enables you to enjoy a **competitive remuneration and benefits package**.

When do you recruit and how do I apply?

We begin reviewing CV's in August after you receive your results. Interviews typically take place mid to the end of August and we aim to offer successful candidates a position in September.

Why JT – what makes you different?

At JT, you can kick-start your career in a fast-paced learning environment with our diverse and talented teams across the business.

We provide you with on the job training alongside highly experienced professionals who will support you in progressing to a stage where you're ready to embark on a **professional qualification** such as **Lean6 Sigma, JAVA, Python, Prince2, CCNA** and many more.

What is life like as a JT Graduate?

“The Graduate scheme at JT is great because we don’t treat you like a typical grad, we welcome you into the team and you are treated like everyone else. This allows you to have the most **enriching experience**”

“I am looking to **spark a passion** in graduates, and once we find that we will place you where you need to be or on the project you want to be on, to build the skills that you need”

“Your Graduate programme is formed based on your passions and degree, so your rotations stem from **what you are interested in.**”

Andy Jarvis
Head of Corporate IT
and a sponsor of our Bursary,
Apprenticeship & Graduate schemes.
